What is the code to select the max number from the list ?

```python
Q3.)
# What is the code to select the max number from the list  ?

from math import inf

tips = [ 11, 23, 100, 21 , 80 ]

maxt = -inf

for i in range(0, len(tips) ):
    # CODE GOES HERE
    pass

print(maxt)

#A.) if tips[i] > maxt:
#        maxt = tips[i]

#B.)if tips[i] < maxt:
#        maxt = tips[i]

#C.)if tips[i] != maxt:
#        maxt = tips[i]

#D.) if tips[i] == maxt:
#        maxt = tips[i]
```
